I thought sending this now would be helpful if you are working today. Its a draft of Version 2, we still have the SVOC, DRO, and GRO from Region 8 to audit along with NERLs to suites. I am thinking NERLs analyses will be in Version 3 but who knows I may get those done sooner.

In the checklist table, you were see things like:

For Version 2: yes for headspace (RSK) and P&T (Region 8) VOCs, water isotopes, dissolved gases, anions, MBAS,

This is our internal check, indicating that we have done that part of the audit for this analyses, and the answer to that question is yes. This will be removed when we send you the real version, but it is our internal status check. For issues where we are waiting on something (like VOC run logs) I have left in a note in that same table - again these will eventually be removed.

Note, Region 8 does not report all of the critical VOCs (they do not report ethanol, isopropanol, and TBA).

I can fix up the tables under Observation 2 a bit when I get a chance, but now the samples are listed here.
